-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant has cancelled all claims other than claims 25-31 and amended claim 25. Claim amendments have been considered and entered. Claims 25-31 will now be considered on their merits.

Response to Arguments

Applicant's arguments, see Amendment After Final, filed 02/18/2009, with respect to the rejection(s) of claim(s) 25-31 under unpatentable over Dereume 6,165,212 in view of Edwin 6,245,099, and further in view of McDonald 6,120,535 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Takehisa JP 11-299901.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 25-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Takehisa JP 11-299901 via translated abstract provided by applicant and machine translation provided by the Japanese Patent Office.

3. Re claim 25 and 26, Takehisa discloses a method for preparing a stent matrix such as the one discussed in the abstract, comprising preparing a tubular stent matrix, 10, forming flexible solid polymer layers on the stent matrix, 19, and perforating a plurality of fine through pores at portions only where the stent matrix does not exist, fig. 2;

wherein forming the layers comprises a step of forming a polymer film by impregnating a mandrel into a liquid resin material, para. [0016], for forming the polymer film and pulling up on the mandrel,

and equalizing the thickness of the polymer film by pulling up on the mandrel in a vertical direction, para. [0033].

Re claim 27 and 29, polyurethane is disclosed as the preferable first material, para. [0016].

Re claim 28, another polymer layer can be added to be impregnated with drugs, para. [0009].

Re claim 30 and 31, laser machining can form fine through pores in the surface, abstract.
